

## ADULT DOG • LESS ACTIVE AND SENIOR ALL BREEDS

This low-calorie formula is designed for the specific needs of less active dogs that are slightly overweight or elderly. The calorie, protein, and fat content has been adjusted to provide your pet with the necessary energy and nutrition, while helping it maintain its ideal weight. This formula contains 21% protein. The fat content has been reduced to 10%. In order to strengthen the immune system of adult dogs, a good essential source of fats like omega-3 contained in flaxseed has also been added.

As dogs age, the cartilage in their joints can harden and lead to articulation problems. That's why Pronature has enriched this formula with glucosamine and chondroitin, two natural supplements that help reduce symptoms and joint pain.

**INGREDIENTS:** Chicken meal, ground yellow corn, ground whole wheat, brewer's rice, beet pulp, chicken fat naturally preserved with mixed tocopherols, dehydrated alfalfa, dehydrated yeast culture, whole flaxseeds, monosodium phosphate, potassium chloride, lecithin, natural flavor, calcium propionate, choline chloride, salt, glucosamine sulfate, rosemary extracts, *Yucca schidigera* extracts, chondroitin sulfate, dehydrated spinach, whole thyme, vitamins and minerals.

### GUARANTEED ANALYSIS:

Crude protein	min. 21%	Crude fibre	max. 3%
Crude fat	min. 10%	Moisture	max. 12%

Available in a range of practical sizes: 3 kg/6.6 lb, 7,5 kg /6.5 lb and 15 kg/33 lb.
